To deliver on our promise of redefining medical education to revolutionize health, we are looking for partners to join us in recruiting an exceptional inaugural class of medical students.

**Fall 2018 Kick-Off**

Thirty-two highly-qualified students will begin their four-year engineering-based medical education in Fall 2018 as part of the first-ever class attending the Carle Illinois College of Medicine at the University of Illinois at Urbana Champaign.

**Recruiting the Top 32**

We will be competing on a short timeline with other premier medical schools across the country for these top incoming students. For the success of our new engineering-based medical education program, it is essential that we successfully recruit the best and brightest students.

Tuition will be approximately $55,000 per student, on par with other privately funded medical schools. Private funds of $32,000 per student are needed to provide substantial scholarship packages, with the balance of support coming from other funds. Scholarships will allow the Carle Illinois College of Medicine to be competitive in recruiting the very best incoming class.

**Your contribution**

You can make an immediate and visible difference in a medical student’s life by funding a Carle Illinois College of Medicine student through our 32 for 32 Scholarship Program. A commitment of $32,000 for four years, or a gift of $128,000, can change a medical student’s life and help ensure the highest quality inaugural class of physician innovators.

You will be invited to actively participate in all significant events related to the inaugural student class such as the “white coat ceremony.” You will be directly connected to the new college, as it grows, enhancing the community and impacting the world through new medical breakthroughs and innovations.

In addition, all gifts will qualify for matching funds of 7% thanks to the generosity of an anonymous donor. Your pledge of $128,000, will result in $8,960 additional new funds for students.

We invite you to join us as we establish the first engineering-based College of Medicine and welcome this inaugural class of students, the start of a very special legacy.

**Be a part from the start.....32 for 32!**
